

PLATING PROCESS WASTE CERTIFICATION

As a representative of and for the generator, familiar with the operational processes of plating, surface coating, anodizing and related techniques utilized by _____, I have assessed all potentially applicable listed hazardous waste codes under Subpart D of 40 CFR 261. I have determined none of these codes are applicable to the waste being represented on the attached documents. Furthermore, the treatment activities represented by Valicor will not generate any hazardous waste represented by the same codes when applied to the waste represented on the attached documents.

For any metal plating, surface coating, etching, or otherwise metal impacting operational processes, are any fluoride-based compounds used, such as potassium fluoride or hydrofluoric acid/hydrogen fluoride (**Yes or No**): _____

I certify under penalty of law that all documents and attachments referenced above were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware there are significant consequences for submitting false information and assume the responsibility for any and all financial and regulatory repercussions resulting from the misidentification or mischaracterization of the waste described herein.

Generator: _____

Waste Name: _____

Profile Approval No: _____

Generator Signature: _____

Printed Name: _____

Title: _____
