

SUSTAINABILITY HIERARCHY

MANAGE YOUR WASTE WITH THE ENVIRONMENT IN MIND

At Valicor, we provide solutions to help you reach your sustainability goals! Here's how:

REDUCE & REUSE

- Provide TWM strategies that create sustainable solutions for a circular economy
- Improve your ESG score with programs created by our experienced team

Valicor processes 300M+ gallons of wastewater each year.

RECYCLE

- Innovative solutions that provide secondary uses for materials
- Oil, kerosene, jet fuel, diesel, gas, detergents & surfactants, beverage, outdated chemicals
- Nationwide coverage

Valicor repurposes 30M+ gallons of oil every year.

MATERIAL CONVERSION & ENERGY RECOVERY

- Mixed waste processing that downcycle materials into secondary products
- 18 Centralized Waste Treatment (CWT) Facilities, Daily Cover, Fly Ash, Alternative Fuels
- Brand destruction services with vast network of warehousing for large CPG recalls

Valicor recycles 75M+ pounds of recyclables each year.

RESIDUALS MANAGEMENT

- Thermal waste processing with energy recovery (e.g. electricity, heat, steam, biofuels)
- Valicor's network of partner companies assures our program minimizes regulated disposal

Valicor processes 22M+ pounds of waste through multiple energy recovery facilities.

REGULATED DISPOSAL

- Traditional landfilling and incineration
- For those materials that still need a home, Valicor provides solidification
- Multiple 10-day facilities within our enterprise to assist with hazardous waste disposal

Valicor provides solidification services at 11 locations nationwide.
