# THE VALICOR DIFFERENCE

## Our Process

In business for over 40 years, we have developed expertise in safely and responsibly treating and disposing of various waste streams, along with cost-effective sustainable solutions for recycling and reuse. Through heat, chemical and mechanical means, Valicor separates out the surfactants and coarse solids before the water's pH is adjusted for safe recycling.

Each year, Valicor recycles and repurposes more than:

**300+ MILLION GALLONS  
OF WASTEWATER**

**30+ MILLION GALLONS  
OF OIL**

**75+ MILLION POUNDS  
OF RECYCLABLES**

## Why Choose Us?

- Valicor takes great pride in being the first Centralized Wastewater Treatment facility to achieve an ISO 14001 certification and we maintain certification for each location.
- Documentation of every gallon processed is provided to customers.
- We focus on sustainable solutions to reduce waste and minimize materials sent to landfills.
- Our expertise in compliance and regulatory requirements, coupled with our vast experience managing the most challenging waste streams, reduces your environmental risk.
- Our wide geographic footprint keeps us close to our customers and we continue to expand!
