Dear Generator / Customer:

This recertification form is required by Valicor Environmental Services, LLC Standard Operating Procedures where this Waste Profile (referenced below) is recertified biennially and the current analysis on file is less than 4 years old. Failure to submit this recertification form prior to the date of expiration will result in the inactivation of this profile.

Profile Number:**Waste Name:****Current Expiration Date:****New Expiration Date:****Please check the appropriate box below:**

- RENEW WITHOUT CHANGE** – If profile entry date is prior to 2022, a new profile must be completed and returned with this renewal.
- RENEW WITH CHANGE** – Complete a new profile and indicate changes in the waste generating process and/or wastestream that are different from information last submitted.
- CANCEL** – this wastestream approval – Reason (optional): _____

Certification:

I certify that all the information provided on this form is true and accurate and has not changed since the previously approved profile form or amendment thereof. I also certify that any laboratory analysis or other supporting documentation submitted with the waste profile is still representative of the current waste stream. As the undersigned, I certify that I am authorized and qualified to make these statements and representations on behalf of the generator for this waste stream.
